PACKS	5 kg, 20 kg

UPDATE FROM CIMENTART HQ, 28/10/2026

- Also in showers.
- Look: coarse texture.
- Mistig water while you trowel is recommended, for every type of microcement.

Where this differs from the data sheet below, this applies.

SYSTEMS AND FINISHES

The new trends in high decoration are very much focused on finishes such as polished concrete, which is nothing more than an aesthetic variation of traditional microcement, with a more rustic, smoothed finish and a more homogeneous colour.

In our brand, polished concrete is AQUA NATURE Microcement, a ready-to-use coating, based on synthetic resins, selected aggregates and minerals and water-repellent additives. It is a product of great hardness and elasticity that is applied manually with a steel trowel, both indoors and outdoors.

AQUA NATURE Microcement is used to achieve a smooth decorative finish, with the effect of traditional cement, of approximately 2 mm, on walls or ceilings. With its application, you will achieve semi-rustic smoothed finishes, continuous and without joints.

AQUA NATURE Microcement has a minimum thickness and due to its adherence properties it can be applied on practically any surface: walls, showers, kitchen or bathroom countertops, facades, furniture, etc., without the formation of debris.

The application of AQUA NATURE Microcement is quick and easy. It can be applied on an infinite number of substrates: plasterboard, plaster, putty, plastic paint, cement, ceramic tiles, tiles, marble, granite, porcelain stoneware, wood, etc.

AQUA NATURE Microcement is available in a wide range of colours, with smoothed gloss, satin and matt finishes.

Its installation is quick and easy; in most cases it is a more economical product than other products on the current market since it is applied in just 2 consecutive layers (fresh-on-fresh system).

As it is a ready-to-use microcement, it is a clean product when it is applied, it is not necessary to do any type of mixing, it does not generate any dust, it is very easy to use and 100% waterproof.

OUR GUARANTEES

CimentArt Microcement declares that its products are guaranteed in the following situations, provided that the application rules and the technical data sheets are strictly followed:

- Crack-free guarantee: our products never crack. If a crack ever appears on our products, it will always be because the surface where it is applied has cracked.
- Adhesion guarantee: we guarantee that our products do not detach or peel off from the surface where they are applied.
- No decolourization guarantee: we guarantee that there is no decolourization or change in colour over time, even if applied outdoors. In the case of outdoor applications, we recommend using light colours.

This guarantee does not cover any structural movements of the building or home that cause cracks, detachment, or peeling on the surfaces where it is applied, or impacts, capillary action, floods, or scratches received on its surface.
