UPDATE FROM CIMENTART HQ, 28/10/2026

- Not in showers: the Aqua line is waterproof, MicroStucco is not. It is so fine and smooth that it becomes slippery in a shower.
- Look: subtle marbling and shading, ready to use.
- Misting water while you trowel is recommended, for every type of microcement.

Where this differs from the data sheet below, this applies.

SYSTEMS AND FINISHES

In CimentArt Microcement, we want to pay tribute to the traditional Venetian stucco or marmorino, products that began to be applied in Roman times and were consolidated 500 years ago as luxury coatings in the palaces of Venice.

We have combined in these products the elegance and art of our past with the chemical evolution of our present to create a ready-to-use product, easy to use, which allows you to create perfect smooth polished surfaces, with its characteristic soft and elegant chiaroscuro (from Italian chiaro, “light,” and scuro, “dark”) marbling.

The Microcement CimentArt MicroStucco is composed of lime, selected micronized minerals, resins, and colorants, and is a product that is ready to use.

It can be applied to any support that is regularized, whether absorbent or not. It is used for finishing and decorating, indoors and outdoors walls, floors or ceilings. On floors that receive a large amount of water (e.g. showers or outdoor floors), we recommend our Aqua Product Range (100% waterproof).

Soft to the touch, the colours and handmade finishes turn each wall into a unique work of art.

Microcement CimentArt MicroStucco comes in 20 standard colours and can also be pigmented manually and with a tintometric machine, making it possible to create a wide range of customised colours.

COLOURS

There may be chromatic differences due to the resolution and calibration of screens and the microcement peculiar finish.

OUR GUARANTEES

CimentArt Microcement declares that its products are guaranteed in the following situations, provided that the application rules and the technical data sheets are strictly followed:

- Crack-free guarantee: our products never crack. If a crack ever appears on our products, it will always be because the surface where it is applied has cracked.
- Adhesion guarantee: we guarantee that our products do not detach or peel off from the surface where they are applied.

- No decolourization guarantee: we guarantee that there is no decolourization or change in colour over time, even if applied outdoors. In the case of outdoor applications, we recommend using light colours.

This guarantee does not cover any structural movements of the building or home that cause cracks, detachment, or peeling on the surfaces where it is applied, or impacts, capillary action, floods, or scratches received on its surface.
